

## About MMOPA

MMOPA serves owners and advocates of the PA46 aircraft through three key tenets:

**Safety** – Promote the safe and professional operation of the PA46. MMOPA provides programming, events, tools and resources to help owners operate their aircraft in the safest manner possible;

**Advocacy** – Represent the best interests of the PA46 community, and the GA community at large;

**Community** – Provide opportunities for owners, partnering companies to connect with each other and celebrate their shared passion for aviation.

The organization hosts an annual convention, which features top-notch speakers and educators in areas of safety, operations, weather, piloting skill and maintenance. The next convention is scheduled for May 30-June 2, 2019 in Amelia Island, FL.

In addition, MMOPA publishes a bi-monthly magazine featuring safety and operational content. Its yearend Safety Annual publishes the PA46 safety data, initiatives and analysis. The MMOPA website has an in-depth library with a variety of maintenance instructions and best practice documents, checklists, POH's and guides. In addition, there are training and safety content, Service Bulletin information and back issues of MMOPA Magazine. New resources are continually added and updated. MMOPA is not affiliated with the Piper Aircraft, Inc., or any other manufacturer/vendor.

**MMOPA SAFETY & EDUCATION FOUNDATION:** A 501(c) (3) charitable entity, the Foundation is an independent entity that is dedicated to engaging with MMOPA members to help them operate their PA46 aircraft in the safest possible manner. The foundation's sole purpose is to promote, support and fund safety initiatives, programming, resources and tools. In addition, it may include direct vouchers to MMOPA members who attend supplemental training events.
